Technical Skills/Knowledge

- **Frontend:** JavaScript, TypeScript, React, Redux, HTML5, CSS, Bootstrap
- **Backend:** Python, FastAPI, Django, PostgreSQL, MongoDB, COBOL, PICK, RESTful APIs
- **System Designs:** Monoliths, microservices, domain-driven design, legacy mainframe systems
- **Developer Tools:** VSCode, Git, Insomnia, Chrome DevTools, Docker

Professional Technical Experience

Reynolds & Reynolds | *Software Developer* | *Typescript, React, Redux, CSS, COBOL, PICK* Jan 2023 - **Current**

- Built automated deep-linking for VW/KIA, reducing dealership lookup time and streamlining data access.
- Developed dynamic API-driven rendering, improving app responsiveness and load performance.
- Architected scalable Redux and custom hook patterns across 50+ themed UIs, ensuring modularity and consistent UX.
- Enhanced vehicle recall workflows to 100% data accuracy and full compliance.
- Implemented secure data handling and validation in React components, preventing injection and XSS vulnerabilities.
- Automated linting, testing, and bundle analysis in CI/CD pipelines to prevent regressions before release.
- Maintained Service Portal 2.0 documentation and technical standards for team-wide alignment.
- Sustained 80–85% test coverage through comprehensive unit and automated test suites.

Additional Professional Experience

Baylor St. Luke's Medical Center | *Senior Occupational Therapist, ICU/Acute Units* Oct 2015 - Jan 2023

- Evaluated and implemented therapeutic interventions within a 24 hour referral order window
- Conducted evidence based treatments to improve patient function for activities of daily living
- Oriented and trained newly hired occupational therapist to the ICU/Acute units

Application Development Experience

Full-Stack Developer | *Hack Reactor Projects* July - Nov 2022

- Built and deployed full-stack apps (Team Table, Carrari, Wardrobify, Scrumptious) using JavaScript, Python, React, Django, FastAPI, SQL, and Docker.
- Delivered secure APIs, JWT authentication, and microservices architecture to support scalability and resilience.
- Improved user engagement and performance through optimized UIs and interactive landing pages. Ensured reliability with end-to-end testing and API validation.

Education

Hack Reactor, *Software Engineering Immersive* 2022

- Completed 774 hours of Full-Stack development in an Agile environment

University of Texas Medical Branch, *Masters of Occupational Therapy* 2015

University of Houston, *Bachelor of Science in Interdisciplinary Studies* 2011
